**Perfect Health Urgent Care + Weight Loss cuts ribbon welcoming Augusta University Health to Peach Orchard Road location**

Perfect Health Urgent Care + Weight Loss will soon host a ribbon cutting to welcome Augusta University Health to its location on Peach Orchard Road in Augusta.

Perfect Health, known for effective urgent care and medical weight loss solutions, will host the ribbon cutting at 3324 Peach Orchard Road on Nov. 5 at 3 p.m., followed by a sign unveiling by Augusta University Health. The event will feature giveaways, refreshments and remarks from one of the three board-certified emergency room physicians who own Perfect Health. Augusta University Health leaders will also be on site during the ribbon cutting and sign unveiling.

On Oct. 18, Augusta University Health began offering primary care by appointment only to patients inside the Perfect Health Urgent Care + Weight Loss building on Peach Orchard Road.

“We’re proud of our working relationship with Augusta University Health and we are pleased to welcome their capable primary care physicians to our Peach Orchard Road location,” said Dr. Troy Coon, one of Perfect Health’s owners. “Our South Augusta patients can now enjoy the convenience of finding a family practitioner in the same building where they receive their urgent care.”

Augusta University Health’s family practitioners are now accepting appointments. To book, call (706)-446-1304 today – spots are filling fast.

Perfect Health Urgent Care provides a quick and affordable treatment option for patients suffering from symptoms that don’t constitute an emergency.

There’s no appointment necessary for urgent care visits; patients are encouraged to walk in to Perfect Health clinics. In addition to treating most non-emergency conditions, Perfect Health’s capable staff can offer medications, X-rays and lab services on site.

These services eliminate the need for patients with minor injuries and illnesses to wait long hours in the local emergency room and allows ER doctors to focus on true emergencies.

The clinic also offers state-of-the-art weight management solutions to subscribing patients.

“It has been our pleasure to serve the Augusta community through our Peach Orchard Road location over the past several months,” Dr. Coon said. “We know the addition of Augusta University Health’s physicians will only enhance our patients’ experiences and we’re thrilled to welcome them to this thriving location.”
